

HOME TASKS-VI

Task 1: Write an SQL query to report the difference between number of apples and oranges sold each day.

Return the result table **ordered** by sale_date in format ('YYYY-MM-DD').

```
+-----+-----+
| Column Name | Type |
+-----+-----+
| sale_date   | date |
| fruit       | enum |
| sold_num    | int  |
+-----+-----+
(sale_date,fruit) is the primary key for this table.
This table contains the sales of "apples" and "oranges" sold each day.
```

Solution: SELECT sale_date,
 SUM(CASE WHEN fruit = 'apples' THEN sold_num ELSE 0 END) -
 SUM(CASE WHEN fruit = 'oranges' THEN sold_num ELSE 0 END) AS
diff
FROM Sales
GROUP BY sale_date
ORDER BY sale_date;

Input:
Sales table:

sale_date	fruit	sold_num
2020-05-01	apples	10
2020-05-01	oranges	8
2020-05-02	apples	15
2020-05-02	oranges	15
2020-05-03	apples	20
2020-05-03	oranges	0
2020-05-04	apples	15
2020-05-04	oranges	16

Output:

sale_date	diff
2020-05-01	2
2020-05-02	0
2020-05-03	20
2020-05-04	-1
